

Safe-Vu

Screen System

WELCOME

Introducing

Safe-Vu

– the range of flexible, hygienic protective screens from the UK's leading producer of aluminium-based screen systems.

Safe-Vu uses specially-engineered rubber fins to deliver unparalleled levels of stability. As the acrylic panels are pushed into position, the fins deflect to hold them firmly in a vice-like grip.

Safe-Vu screen systems are built using lengths of our AluGrip6 extruded aluminium profiles. Precision-anodised and cut using state-of-the-art CNC machinery, these profiles have been designed to create protective screens that suit desks and workspaces of all shapes, sizes and functions.

Introducing

Safe-Vu

– the range of flexible, hygienic protective screens from the UK's leading producer of aluminium-based screen systems.

Please Note: Top Cap is pre-fixed to the post.

- **Straightforward, Tool-Free Assembly** – thanks to the inclusion of rubber fins, Safe-Vu systems can be assembled easily and quickly without the need for any specialist tooling or prior experience.
- **Rapid Delivery** – all Safe-Vu screens and accessories are designed, developed and manufactured **In house**. This means large-volume orders can be delivered and installed within short lead times, regardless of whether the product dimensions are standard or bespoke.
- **Unparalleled Stability** – solid aluminium profiles are used to support the acrylic panels ensuring they remain secure and stable at all times. Additional fixing brackets can be incorporated to screw, bond or clamp Safe-Vu screens onto desks and workspaces.
- **Elegant Design** – we believe that there is no reason why protective screen systems should look unsightly. Designed to be slimline and transparent, the Safe-Vu range provides a sleek, elegant solution that blends seamlessly into all commercial environments.
- **Easy to Store** – recognising the importance of functionality and flexibility, we designed all of the components that form Safe-Vu screens to be flat-packable so that they can be stored easily if necessary. All systems are supplied with clear, tool-free assembly instructions.
- **Hygienic** – all of the aluminium profiles, acrylic panels and accessories can be sanitised quickly and easily with standard household disinfectants.
- **Ultra-Flexible** – the Safe-Vu range can be used to construct screen arrangements of all shapes and sizes according to your specific spatial requirements. Screens can be extended or reconfigured to suit any changes in the layout of a workspace.

As we face an unprecedented time in our lives, it's important now more than ever to look after each other and keep each other safe.

We've asked ourselves; what we can do today, that would make a difference tomorrow?

Our modular aluminium system that we have in stock can be quickly fabricated to create protection devices to be used in areas where people still must interact with one and other.

Fin

Fin uses cutting-edge AluGrip6 technology – a range of supportive feet and connective brackets that securely lock laser-cut panels of 6mm acrylic together. AluGrip6 systems offer unparalleled flexibility and are ideal for use in reception areas, retail spaces, commercial offices, cafes and more.

Pg. 4

Float

Float utilises a range of specially-developed aluminium profiles to create a vast array of easy-to-assemble screen systems that are structurally robust whilst remaining elegant and visually inconspicuous.

Pg. 11

Free

Free systems are built using strong, aluminium-framed screens and are available in a range of options – static, mobile and portable. All Free systems are highly-stable yet stylish, making them idea for use in offices, large commercial spaces and production environments.

Pg. 23

Fin

is a range of free-standing screens that has been designed for use in a variety of environments including reception areas, offices, customer service desks and flexible meeting spaces. Fin systems can be supplied with or without access ports and can be manufactured according to client-specific dimensional requirements.

Fin - Clear

idea Showcases

Free-standing Fin screens are built using 6mm panels of laser-cut acrylic to create aesthetically discrete, precise solutions.

Featuring laser-cut slots in the acrylic panels and corresponding slots in the acrylic feet, Fin screen systems are straightforward to assemble and don't require the need for specific training or tools.

Float

Float is a range of robust yet visually elegant protective screens. Built using transparent acrylic panels and anodised aluminium profiles, Float systems blend seamlessly into commercial spaces of all types whilst making no compromises in the levels of protection delivered at each individual workstation.

Float - Configurator

Float screen systems can be built using an array of different aluminium profiles and connectors, all of which have been designed by Idea in-house. Each profile is fitted with a colour-matched end-cap to ensure panels are aligned precisely. Using our Float configurator, you can explore the range of different options that are available and select one to suit your specific requirements.

Finishes

When specifying protective screens for your office, meeting room or shared workspace, the importance of addressing health and safety risks cannot be overstated. This does not mean, however, that aesthetic appeal should be sacrificed.

Engineered to perform both effectively and reliably, yet designed to blend seamlessly with any existing interior features, our Safe-Vu screen systems mean you won't be left making uncomfortable compromises.

Finishes

Safe-Vu screens are available in a wide variety of different finishes to suit environments of all styles.

The aluminium uprights and accessories can be anodised in a range of colours so that, once installed, the entire system will sit harmoniously with existing furniture and decorative themes.

Each panel of laser-cut acrylic is also available in a selection of different finishes, thereby making it easy to create tasteful, elegant screen systems that deliver unparalleled levels of functionality.

Safe-Vu divider screen panels come in 6mm clear acrylic as standard. But other options are available:

- Frosted, coloured/tints and glass effect acrylics.
- PETG
- 6mm toughened glass

Please get in touch for more details mail@ideashowcases.co.uk

Standard anodised aluminium Safe-Vu system with 6mm clear acrylic.

Black anodised aluminium Safe-Vu system with 6mm clear acrylic.

Black anodised aluminium Safe-Vu system with 6mm grey tint acrylic.

Anodised aluminium Safe-Vu system with 6mm frosted acrylic.

Anodised aluminium Safe-Vu system and 6mm clear acrylic with print or vinyl graphics.

Anodised aluminium Safe-Vu system and 6mm clear acrylic with laser etched graphic.
