Salon Hygiene Screen

The Hygiene Screen is a combination of aluminium frame & 3mm steel base with an acrylic panel to provide peace of mind and a safe barrier between clients.

The divider has been designed with both client and hairdresser in mind, for ease of manoeuvrability, when cutting hair. The Low profile base presents less chance of a trip hazard. The design also makes it easier for cleaning the panel down and sweeping the base after each client.

Holes can be provided in the base plate of the self-standing divider, so once easily positioned in place it can be fixed to the floor for additional security.

Wanting to add safety and style to your premises with the Salon Hygiene Screen then we look forward to your inquiry. Personalised branding options possible for an additional cost.
